PCStation *Plan* Presentation

Derek Almeida, Yejun Choi, Jack
Dipompeo, Tyler Wu

The Sony logo is displayed in a bold, white, sans-serif font. It is positioned on a dark, curved surface that appears to be part of a car's bodywork, with horizontal lines suggesting a grille or a sleek design element. The lighting creates a sense of depth and highlights the metallic texture of the surface.

Company History/Background

- Sony was founded in 1946 as Tokyo Tsushin Kogyo K.K. by Masaru Ibuki and Akio Morita
- The goal of the company was to never fall into the same issues of other larger companies, to stay true to their mission and vision, and with a primary goal to constantly innovate and improve
- Currently, the company is headquartered in Minato, Japan
- The company has also expanded outside of Japan, with an arm of the company in America (The Sony Corporation of America), and several headquarters within the country as well

MISSION

“A company that inspires and fulfills your curiosity.”

“Using our unlimited passion for technology, content and services to deliver groundbreaking new excitement and entertainment, as only Sony can.”

Core Goals

- Create a greater synergy between itself and the company's partners
- Improve upon the sustainability of its products and environmental efforts
- Increase overall earnings and total payout ratio
 - ¥ 4.8 trillion
 - 40%
- Increase revenue base, investments, and overall profitability

Sony Interactive Entertainment (SIE) Goals

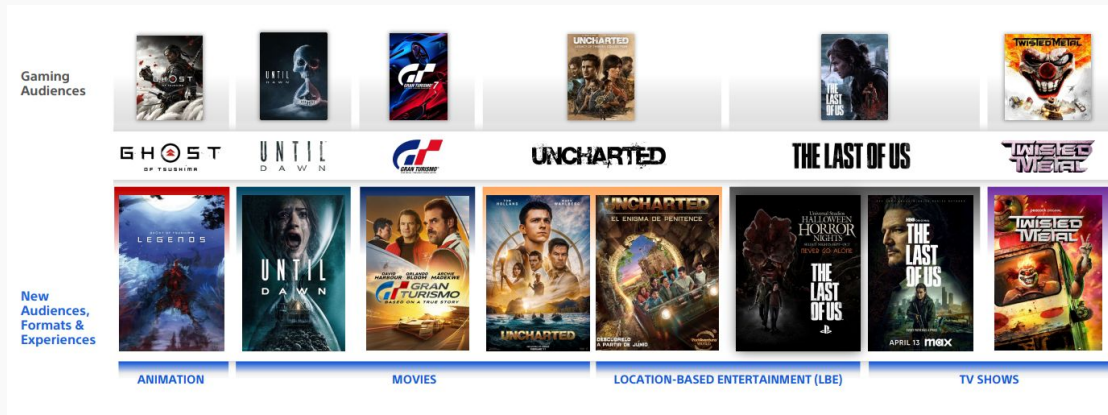

- Leverage IPs and services to improve customer experience
- Increase IP portfolio
- Increase sustainability of consumer base
 - Single-Player
 - Multi-Player/Live-Service
- Produce a multi-device ecosystem

Core Competencies

- Extensive range of industries and widespread influence
- Expansive catalogue of IPs and brands in different industries
- Innovation in technological fields

Competitive Advantage

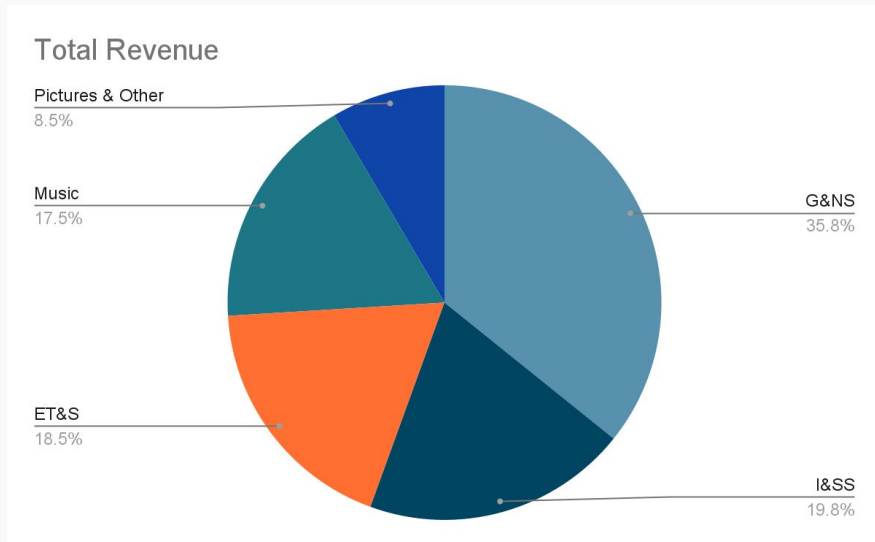

- Sony can maintain several distinct sources of revenue at once
- Improved synergy across different industries
 - Collaboration within its segments to leverage IPs
- Consistent revenue from continuously improving products

*FY25 SIE Business Segment
Presentation*

Sony's Gaming Positioning

- PlayStation holds the largest global gaming console market share at approximately 45%
- Sony's Game & Network Services segment (including PlayStation sales, game sales, and PlayStation Plus) generated ¥1.1 trillion in Q2FY2025 (approximately \$7B) (Q2 FY2025 *Consolidated Financial Results*)
- G&NS accounted for 35.8% of the company's total revenue

“Pictures & Other” actually makes up closer to 11.8% of revenue but chart could not include it

Competitor Analysis

Microsoft:

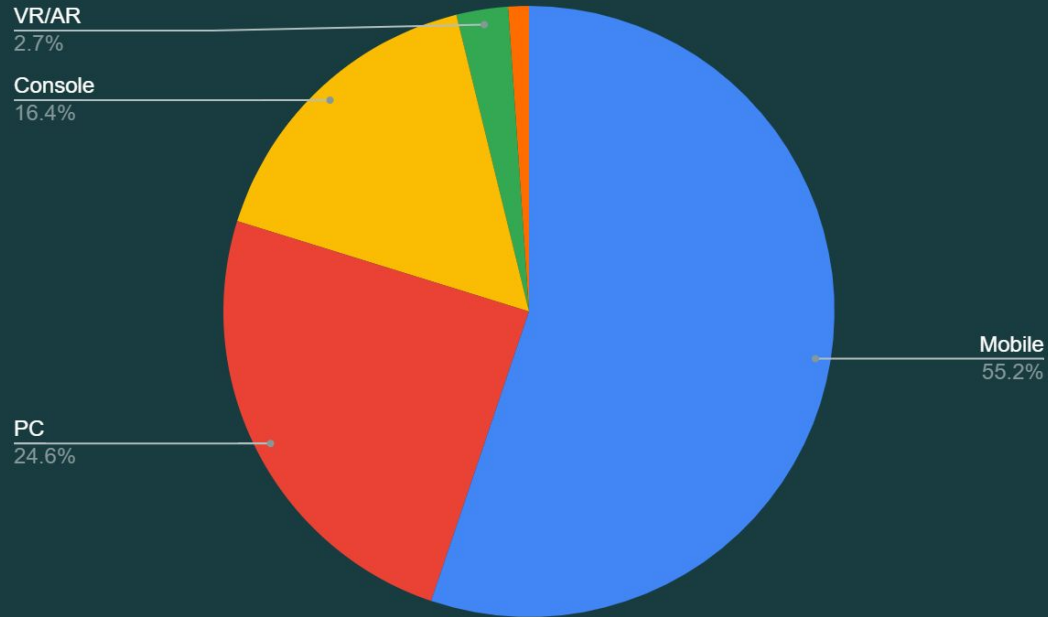

- US technology giant based in Redmond, Washington with a large variety of segments
- Owns Xbox (specifically Microsoft Gaming division)
- Game Pass similar to PlayStation Plus, but grants access to newer games and higher ticket releases
 - PlayStation Plus, however, offers more games and a larger overall catalog comparatively

Nintendo:

- Japanese consumer electronics company based in Kyoto
- Involved in the gaming industry for over 40 years
- Maker of DS, Switch, and Switch 2 consoles
- Released some of the best selling consoles of all time in terms of total lifetime sales

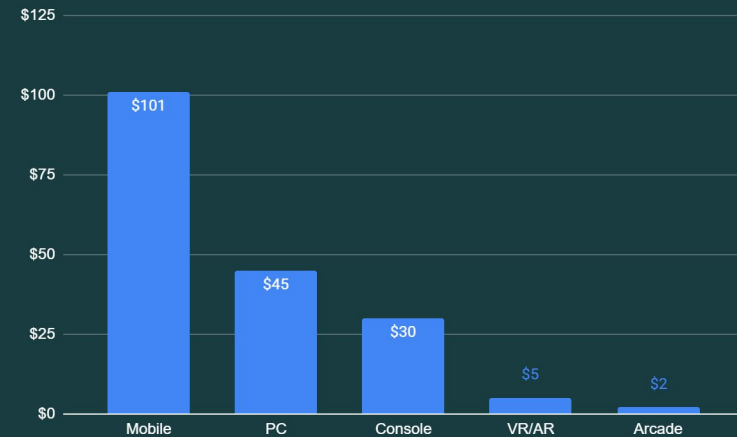

Global Gaming Market (2022)

Revenue per Platform

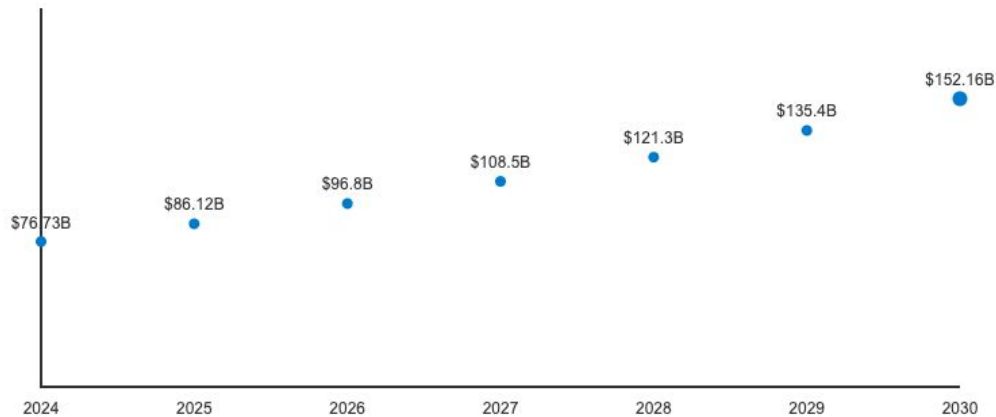

114.3%

Increase of the global PC market over the past 10 years

Global PC Market

- The PC market makes up a significant portion of the gaming industry and is relatively untapped for Sony
- Global PC gaming market valued at \$76.7B, expected to reach \$152.2B by 2032
- Represents a CAGR (Compound Annual Growth Rate) of about 8-9%

*PC Gaming Market Size
Statistics (2025)*

SWOT Analysis

Strengths

- Strong market share of console market (around 45%)
- Strong financials with Q2 FY2025 revenue coming in at ¥1.1 trillion (\$7B), with projected 8% increase in FY profit
- Robust ecosystem and user base
- History of innovation (CD, DVD)

Weaknesses

- Involved in some of the most competitive industries globally
- Competitors include multinational conglomerates with strong financial and operational histories
- Recent over-reliance on exclusive game titles and failed launches

Opportunities

- Expansion into the PC market, which is expected to nearly double by 2030
- Expansion into countries that do not have a large Sony/PlayStation presence
- New exclusive games and titles that are done more efficiently, helping grow the brand and the user base

Threats

- The gaming industry and Sony's broader business is susceptible to economic slowdowns
- Increasing competition from companies like Microsoft and Nintendo
- Growing PC market share and PC adoption

Growth Strategies

- We intend to grow by targeting the rapidly growing PC market and pairing it with our loyal console base
- Our large presence in the gaming industry can be leveraged in order to grow the brand in new markets
- Targeting the PC segment will allow us to capture a rapidly growing segment of the gaming industry, translating growth into adoption and profit growth
- Global PC gaming market worth \$76.73B in 2024, and is expected to reach over \$152B in 2030 (PC Gaming Market Size Statistics (2025))
- We will capitalize on this opportunity by creating a PC and console hybrid called the PCStation
- The PCStation will effectively integrate PC elements into a console layout, including having a customizable overlay, improved performance, and increased graphics customization
- In order to mitigate recent over-reliance on exclusive titles, we will focus on producing fewer, higher quality titles in order to ensure successful launches and keep individuals on our ecosystem

Target Markets

- The current target market for Sony's gaming industry and PlayStation are gamers *below the age of 35*, consisting of Millennials and Generation Z
- The intended target market of the PCStation will be consumers within Generation Alpha to Millennials within North America, Europe, and Japan
 - Individuals who have either already owned a console or PC or seek a new platform and capitalizing on continuous growth

Demographics & Segmentation Data

- 79% of PlayStation's current market comes from North America, Europe, and Japan
- A near even split between male and female demographics
 - 52% and 47% respectively
- Generation Alpha, Generation Z, and Millennials make up the vast majority of console users
 - The majority of these demographics play more than 1 hour a week

Key: P = Primary Market; S = Secondary Market

Market Segments		Gaming Product			
General	Group With Needs				
		PlayStation 5	Xbox Series X	Nintendo Switch 2	Gaming PC
Gender	Male	P	P	P	P
	Female	P	P	P	P
Age	0-20	P	P	P	P
	20-40	P	P	P	P
	40+	S	S	S	S
Needs	Price	S	S	P	S
	Performance	P	P	S	P
	Experience	P	P	P	P

Points of Differentiation

- Integration of PC aspects into a Console
 - Inherent overlay
 - Superior hardware integration
 - Enhanced customizability
 - Simplicity paired with functionality
- Reduced Price Point
 - Priced at \$725
 - Cheaper than mid-level and higher end PCs
- Sony/PlayStation Ecosystem
 - Major reason as to why PlayStation has a dominant market share in the console market
 - Will be integrated on the PCStation, allowing users to easily transfer over and have familiarity

Positioning

With the PCStation, customers will have the ease of use of a console while having the higher end hardware and performance of a PC, leveraging the relatively lower price in tandem with the current user base and ecosystem to support the release.

Marketing Program

Product Strategy

- A PCStation will possess numerous features that separate it from previous consoles such as a gaming overlay, increased customization, and improved hardware
- The intent of the PCStation is for these aspects to attract consumers who are both looking for a superior console but also the unique aspects that we offer with it

Pricing Strategy

- We intend to price the PCStation at \$725, higher than our current PS5 at \$550 but lower than PCs and the PS5 Pro. at \$750
- We will also update PlayStation Plus to include better deals on select titles to incentivize purchases

Promotion

- Social media and collaboration with content creators will be utilized in order to advertise the PCStation
- In-store layouts will be optimized and decorated to show off the PCStation

Place

- Sony and the PCStation will continue to use the same omnichannel method that they currently utilize, allowing for purchases both in-store and online.

Marketing Program Continued

- As a part of our marketing strategy and to support our growth strategy, we will utilize a series of surveys, questionnaires, and in-depth market analysis to analyze what individuals are thinking and find key ways to improve our products and services
- These surveys and overall research will be a core part of our overall marketing strategy, and will be used prior to launch in order to gather data on what consumers are looking for, and after launch to assess our success

An example survey we will be using to assess traits that are desired in our product:

- 1.) Have you ever played video games?
- 2.) Do you still play video games?
- 3.) If answered “yes” to 1 or 2, what games and on which consoles?
- 4.) Why did you choose this specific console?
- 5.) What did you like or dislike about the console in terms of the features and the overall experience?
- 6.) Would you consider getting another console? If so, which console and why?
- 7.) If a console/PC hybrid came out how likely would you be to purchase this console on a scale of 1-10?
- 8.) What features would be most important or appealing to you on this new product?

Evaluation of Success

- Quantitative Factors (One Year / Five Years)
 - How many units were sold?
 - Total revenue and profit
 - Total market share comparison and growth over each year
 - (Repeat process)
 - Comparison of demand relative to forecasts
 - End of five years
- Qualitative Factors
 - Reviews for the console
 - Online forums
 - Surveys
 - Website reviews
 - Etc.
